

FOREPOLING RING BIT SYSTEMS

FOREPOLING RING BIT SYSTEMS are designed for drilling injection casings for tunnel construction in weak ground conditions. Ring bit systems are designed for both top and DTH hammers.

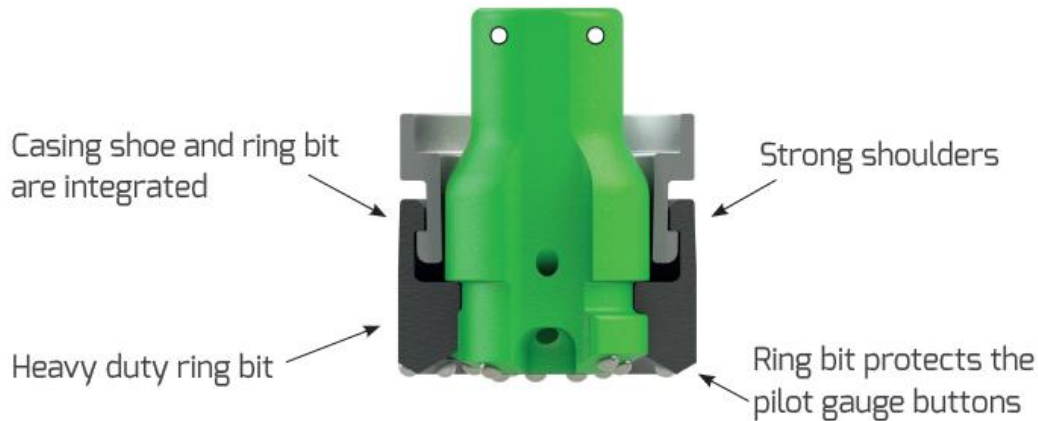

Main **applications** for forepoling systems are:

1. Spiling casings
2. Fibre glass face stabilization
3. PVC foundations

FOREPOLING SYSTEM -KEY DESIGN FEATURES

System is available from 76 mm to 216 casings and for all major shank and thread types (top hammer).

System	OD (Inch)	Max wall	Ring bit ID	Ring bit OD	Pilot bit OD
F76-8-47	76,1 (3")	8	47	89	59
F89-8-60	88.9 (3 1/2")	8	60	105	71
F102-10-XX	101,6 (4")	10			
F114-10-76	114,3 (4 1/2")	10	76	130	89
F140-10-XX	139.7 (5 1/2")	10			
F159-10-XX	159 (6 1/4")	10			
F168-10-XX	168.3 (6 5/8")	10			
F216-12.7-167	216	12.7	167		
F216-12.7-171	215,9 (8 1/2")	12.7	171	237	186
